VSS22/EN/XX/0

# Welcome to VIGOR!

On the following pages you can find everything you need to know about the VIGOR storage system. This brochure is intended to give you an insight into how you can further improve organisation in your workshop.

The VSS serves many purposes and makes your everyday work much easier. Be more efficient in your work by sorting your tools or consumables to make them more quickly accessible.

## HIGH CABINETS

- Optimal storage of tool boxes, work clothes, containers or motor vehicle parts
- Can be extended with additional V6000-017XL storage shelves
- Includes 2 storage shelves

## COLOURS

- RAL 9005
- RAL 7005

## LOCKS

- All locks with simultaneous locking and central locking

## PERFORATED TOOL PANEL PLATES

- For equipping tools and accessories
- Hole spacing gauge dimension: 38 mm
- Hole size: 9 x 9 mm

## CORNER BASE CABINET

- For corner extension of the storage system line
- Including 1 storage shelf adjustable in height

### Martin Rasch

*My name is Martin and I am a master car mechanic from Wuppertal. I have been a fan of the VIGOR storage system for years now. My workshop has never been so orderly – tedious searching for parts is a thing of the past!*

## ATTACHMENT

- The installation material is included in delivery

## WALL CABINETS

- Optimal storage of tools or consumables
- Equipped with sturdy gas spring shock absorbers

## WORKTOPS

- In stainless steel and wooden design
- Available in two working depths: 500 and 700 mm

## TOOL TROLLEY PARK

- Space-saving storage of the tool trolley under the wall unit worktop
- Especially for the VIGOR storage system
- Four swivel castors and two front handles allow easy manoeuvring

## BASE PANELS

- Included in delivery

## ADJUSTABLE IN HEIGHT

- Simple height adjustment up to 50 mm via threaded feet

So, Martin asks:  
*What are you waiting for?*

## Want to keep things neat and tidy? **Who doesn't!**

Are you looking to improve your organisation and have a clearer overview of where everything is in your workshop?

You finally want to have permanent places for your tools and consumables?

Of course you do!

Try out our popular planning tool today and meet all your needs by configuring your very own custom-made **wall unit in seconds!**

# Whether on your tablet, laptop or computer. **Start configuring now!**

- **2 modes**  
Linear or angular
- **Wood and stainless steel worktops**  
500 mm or 700 mm working depth
- **Installation aid**  
For perforated tool panel plates and worktops
- **Forwarding of configuration**  
Sending to multiple email addresses is possible
- **Dimensional drawing**
- **Graphic illustration of the configuration**
- **Naming the configuration**
- **Materials overview and price list**
- **Assembly service**
- **Dealer Search**

## #teamwork

Here you can find out what exactly our customers think of our storage system!

We went to visit Martin Rasch at his workshop in Wuppertal.

Take a look at how professionals organise their equipment in the storage system:

*"Storage compartments help to free up  
space in the workshop."* Martin Rasch

# Overview and information

This overview is designed to show you the individual advantages of each cabinet.

Each individual cabinet can help improve your daily work in the workshop – you decide which one suits your needs best.

## Drawer lower cabinets

- Clean storage of tools, small parts or various consumables
- To save space and for tidy organisation, we recommend VIGOR separation sheets or soft foam inserts
- Max. loading capacity of drawer: 25 – 40 kg – depending on model –

## Multi-purpose lower cabinets

- Waste bin (35 l) with access flap for quick waste disposal
- Paper roll holder
- Loading capacity of drawer: 25 kg

## Lower cabinets for waste

- Including 35 l waste bin
- Practical pass-through flap for quick waste disposal
- High drawer enables convenient emptying of the waste bins

### Supporting lower cabinets

- Including 1 storage shelf adjustable in height
- Base panels including in delivery
- Doors with magnetic lock

### Supporting feet

- Adjustable in height
- Privacy panel included in delivery

### Double hinged-door wall cabinets

- Including 1 storage shelf adjustable in height
- Hinged-door can be rotated to left or right hand stop
- Doors with magnetic lock
- Loading capacity of storage shelf: 15 kg
- Loading capacity of shelf base: 20 kg

### Wall cabinets

- Including high-quality gas spring shock absorbers
- Loading capacity: 25 kg

### Double hinged-doors lower cabinets

- Including 1 storage shelf adjustable in height
- Hinged-door can be rotated to left or right hand stop
- Doors with magnetic lock
- Loading capacity of storage shelf: 40 kg

### Tool trolley

- Fits perfectly under the worktop
- Mutual drawer locking prevents accidental tipping over
- Including protection mat
- 4 swivel castors
- 2 front handles

### Corner base cabinet

- Including 1 storage shelf adjustable in height
- Corner extension of the storage system line
- Hinged-door can be rotated to left or right hand stop
- Door with magnetic lock
- Loading capacity of storage shelf: 40 kg

### Bridge-type lower cabinet

- Easy bridging of worktops – optimal together with 500 mm deep worktops
- Loading capacity of drawer: 25 kg

### Hinged-door high cabinets

- Including 1 storage shelf adjustable in height
- Hinged-door can be rotated to left or right hand stop
- Doors with magnetic lock
- Loading capacity of loose storage shelf: 30 kg
- Loading capacity of welded storage shelf: 60 kg

## Drawer lower cabinets

Large selection and lots of storage space –  
work made fun!

Sort your tools just the way you like it!  
With our drawer lower cabinets you know  
where everything is at a glance.

## Available in slim and wide design

## Lower cabinets

**Waste disposal at work?** It's an important topic. Upgrade your workplace with the addition of our supply and waste disposal lower cabinets or hinged-door cabinets. The cabinets help you to keep worktops clean and make it simpler to quickly and easily dispose of waste.

The bridge-type lower cabinet is ideal for creating a workspace in small niches.

The corner base cabinet offers you the option of connecting wall units at corners. Attractively designed, this option allows you to have a large workplace with plenty of work space.

## Available in slim and wide design

## High cabinets and wall cabinets

With our high cabinets, you have the option of storing large tools, suitcases or clothes in the workshop.

The high cabinets come with a total of 3 storage shelves. One of the shelves is firmly welded, the remaining two are loose and can be placed freely.

The wall cabinets are also practical for storing tools, cans or consumables – **at eye level.**

The double hinged-door wall cabinet also comes with a storage shelf that can be placed freely at the desired height.

# Supporting feet and lower cabinets

With our supporting feet and supporting lower cabinets, we offer you the option of integrating open workspaces into your storage system.

Take advantage of this to:

- position a tool trolley
- store miscellaneous items
- work in the shop from the comfort of a chair

Perforated tool panel plates possible for both versions!

## Available in slim and wide design

## 500 mm worktops

Stainless steel or wood – both are good!  
Many like their worktops to be clean and shiny, others more rustic. Our stainless steel worktops are robust and incomparably attractive.

The stylishly textured surface helps give your workplace aesthetic appeal. While the wooden worktops add a touch of colour to your workplace. The multi-coated multiplex board from Germany is stable and suitable for workshops.

## 700 mm working depth

Our entire product range is also available with a working depth of 700 mm. To make this possible, appropriate components such as an extension frame and a deeper worktop are required. Thankfully, we have just the solutions you need. Read on to find out more.

500 mm lower cabinet

+

Extension frame

=

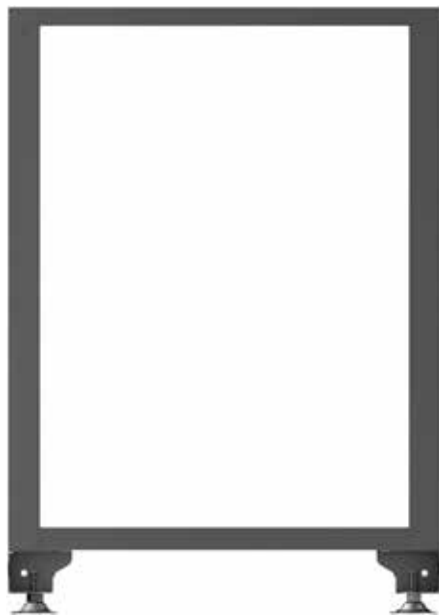

700 mm working depth

# 700 mm extension frames

For the professional extension of your lower cabinets to a working depth of 700 mm, you need extension frames that are screwed to the back of the lower cabinet.

## Extension frame

### V6000-042

- W 676 x H 953 x D 200 mm

### V6000-042XL

## Base panel

### V6000-043

- For lower cabinets with extension frames
- W 650 x H 90 mm

+200 mm

# 700 mm at corners

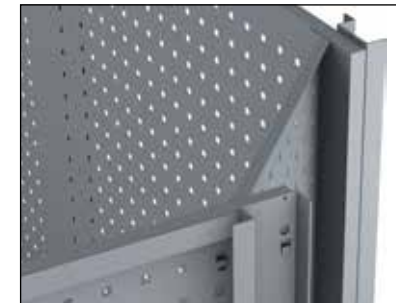

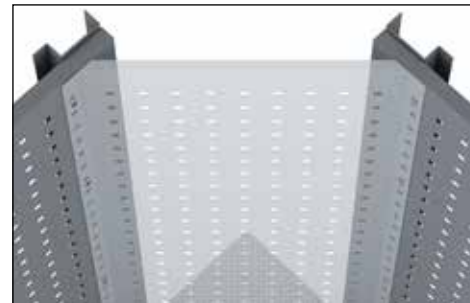

There is a special solution for extending a corner base cabinet to a working depth of 700 mm.  
If perforated tool panel plates are to be added here, you will also need a corner perforated tool panel plate to fill the gap between the lower cabinets.

## Corner perforated tool panel plate

### V6000-048

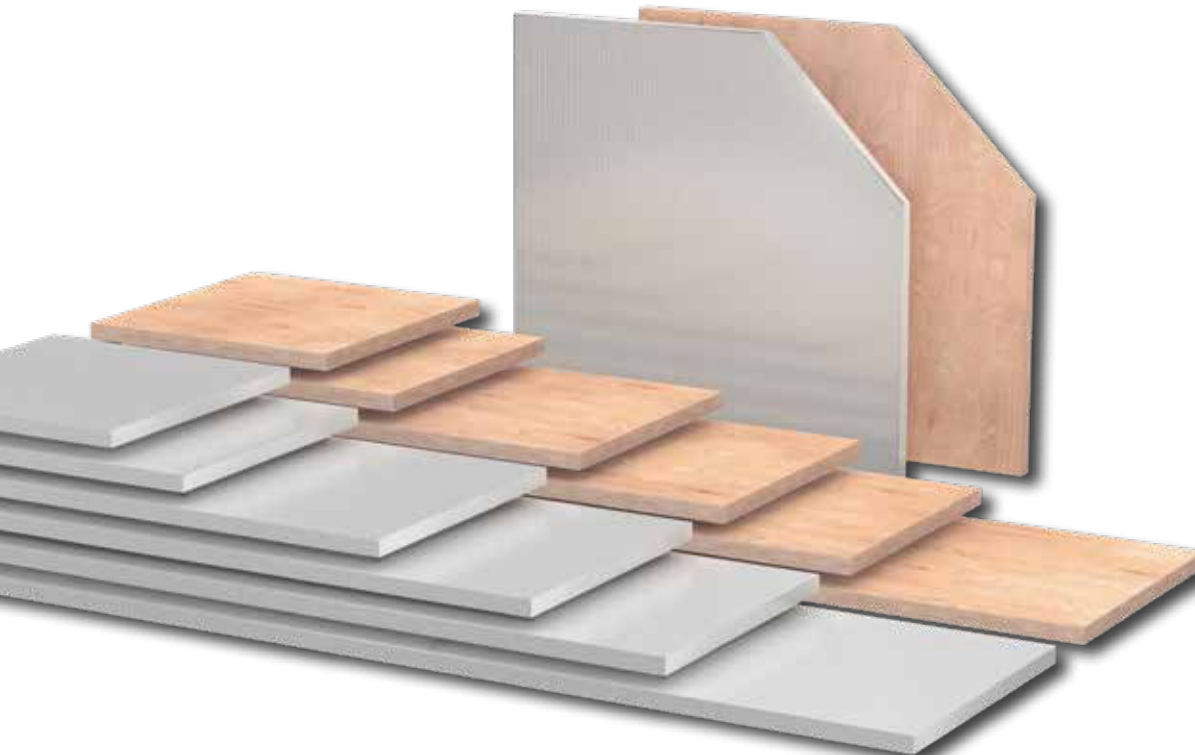

- Connection of two perforated tool panel plates via the corner
- Only in combination with a 700 mm deep corner worktop
- Hooked into the square holes of the adjacent perforated tool panel plates
- The sides of the perforated tool panel plates are folded inwards
- Compatible with VIGOR tool hook sets

# 700 mm worktops

The numbers speak for themselves here. A 700 mm deep worktop gives you plenty of space and storage area. Anyone who has ever worked in a workshop is familiar with this problem. There is not enough space and the workshop quickly becomes untidy.

Why not increase the workshop space you have at your disposal!

VIGOR\_EQUIPMENT\_OFFICIAL

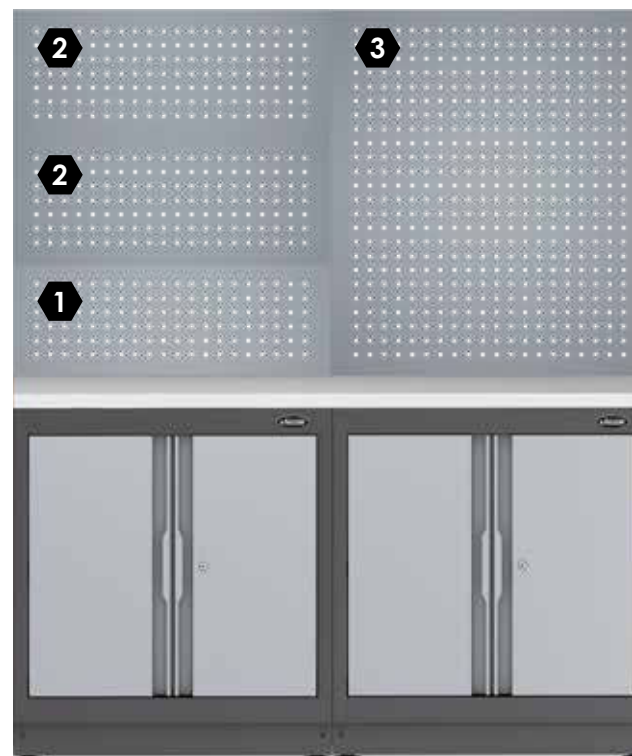

# Perforated tool panel plates

To use your wall unit as efficiently as possible, we recommend the use of perforated tool panel plates. The tool panel plates can be used to neatly store tools within easy reach, meaning they are no longer left lying around on the worktop.

We divide the perforated tool panel system into three levels. For the upper two levels, perforated tool panel plates with a height of 342 mm are used, for the lowest level, perforated tool panel plates with a height of 301 mm are used.

For the lower level we offer a very practical perforated tool panel plate with power supply.

**Note:**

If you are planning on having a wall cabinet, it replaces the perforated tool panel plate.

If you are not planning on a wall cabinet, you can simply use an extra-large perforated tool panel plate.

## Available in slim and wide design

### 2 Only for the middle and upper level

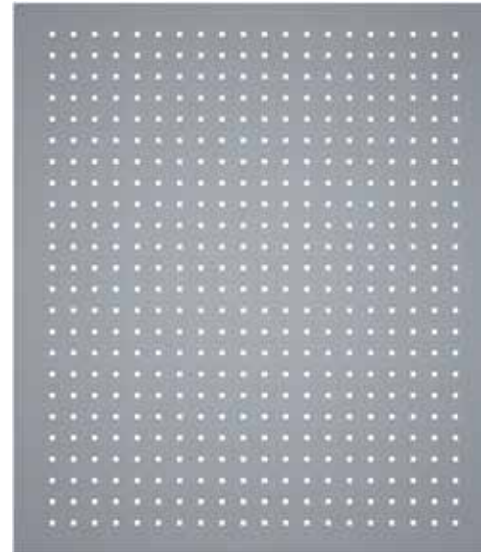

**V6000-05**  
• W 676 x H 342 mm

**V6000-015**  
• W 861 x H 342 mm

• W 676 x H 301 mm

**V6000-015SP**  
• W 861 x H 301 mm

- Integrated 3-way protective earth socket strip 220 V, 50/60 Hz
- With toggle switch for deactivating the power supply
- 4 USB ports (2.1 A)
- Cable length: 2 m

### 1 Only for the lower level

# Attached parts

The perforated tool panel brackets are a prerequisite for the installation of perforated tool panel plates. They are screwed to the back of the lower cabinets and bring stability to the system. Once they are screwed in place, the perforated tool panel plates can simply be hung on. If you do not plan on installing any perforated tool panel plates, you can use the brackets together with connection plates to connect the lower cabinets. The sides of the lower cabinets are covered by base panels.

## **V6000-040/4**

### **Connection plates**

- Additional rear stabilisation of the lower cabinets. Only for assembly without perforated tool panel plates
- Including screws and nuts
- 4 plates included in delivery

## **V6000-010**

### **Base panel for lower cabinet**

- To neatly close off the side walls of all lower cabinets
- Prevents dust and dirt from getting in
- Screws for fastening included in delivery
- W 472 x H 90 mm

# Perforated tool panel bracket

## Features

- Wall installation possible
- Attachment of the perforated tool panel bracket to lower cabinets also possible from the front
- Full-surface suspension of perforated tool panel plates possible
- Quick identification
- Suitable for all VIGOR perforated tool panel plates

**V6000-047M**

Perforated tool panel bracket, middle  
• W 156 x H 1980 mm

**V6000-047LR**

Perforated tool panel bracket set, left and right  
• W 80 x H 1980 mm

# Accessories

With our accessories, you can equip the perforated tool panel plates according to your needs. This makes it easier for you to hang and store your tools and consumables properly, so that you neat, tidy and efficient workplace.

### V6000-055XL

#### Torque wrench holder, large

- Opening width: 26 mm
- For common torque wrenches
- With edge protection

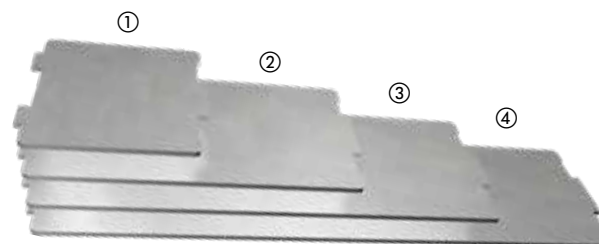

## Separation sheets

Storing consumables is a basic requirement and can save you a lot of time and effort in your day-to-day workshop life. Use the VIGOR separation sheet sets for both drawer sizes and arrange compartments to meet your needs. The separation sheets can be configured both horizontally and vertically.

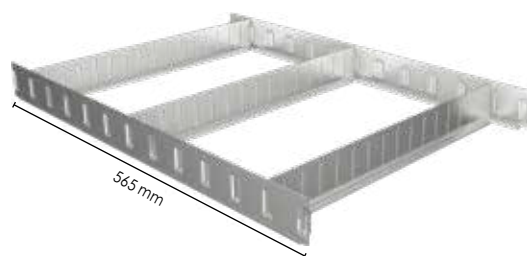

The asymmetrical punching allows you to place them in a row. The folded edge provides a stable hold on the storage shelf, while the hot-dip galvanised coating prevents rusting.

Compatible with all separation sheet sets and cross members!

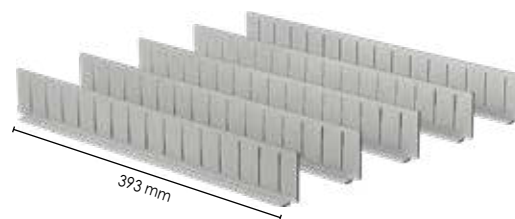

## More organisation for your cabinet drawers!

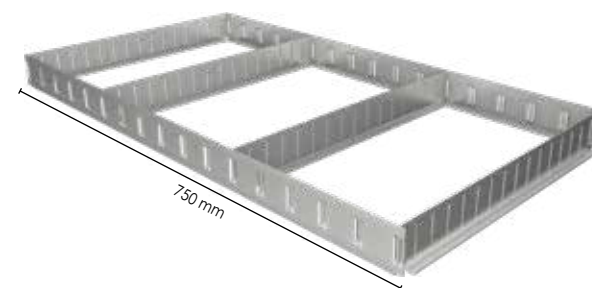

### **V6688**

**Set of separation sheets**  
• For slim design

• 137 mm, 10 pieces

④

### **V6685-4/10**

**Set of divider plates**  
• For partitioning within a column  
• 183 mm, 10 pieces

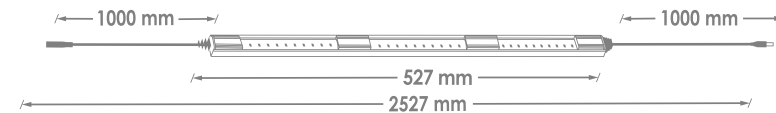

## Lamps

Every workplace should be well illuminated so that you can work as cleanly and accurately as possible. With good lighting, you see things more clearly. It is simply a must for every good workspace.

We recommend our 1000 lumen LED light strips, which fit exactly under our wall cabinets. The connecting cables are 1000 mm long and can easily be connected to other LED light strips.

A maximum of 3 LED light strips can be connected in series.

- Power supply unit included
- Cable length: 1 m

### V7283/2

#### Basic set of LED light strips

- Including on/off switch
- Including adhesive strips for installing on non-magnetic surfaces

### V7283

#### LED light strip expansion set

- Including adhesive strips for attachment to non-magnetic surfaces
